TIRES

M131

The **M131** from Toyo Tires is a tube-type highway-rib, all-position tyre primarily designed for steer axle applications.

The M131 features wide tread width and a flat crown radius for optimum handling and improved wear qualities.

Features & Benefits

New generation tread compound

Long tread life and high grip levels

Wider tread width compared to the superseded pattern

Improved grip levels and tread life

Designed using DSOC II technologies

A flatter crown radius with a longer, wider footprint for improved handling and tread life

Suitability
